

Maxxcontrato

AR-RAXX DATA

PRESENTATION

Security and agility have always been goals pursued in the celebration of contracts and not always achieved through the traditional models.

Through advanced technological tools, based on the use of digital certification, and best business practices, the celebration of contracts is held in real time, without the need of paper, the presence of persons outside the negotiation and perfect control of all phases of signing contracts process.

Maxxcontrato is the ideal tool to optimize the performance of your company and ensure total security of important and strategic information.

Characteristics:

- × 100% web used.
- × Integration of Digital Certification resources.
- × Portability - access from any computer connected to the Internet.
- × Compatibility with Windows 98 or newer.

Functionalities:

- × Purview record fulfilling the need for a workflow of signatures for any type of contract.
- × Digital signature of electronic contracts
- × Presentation of signatures history.
- × Online monitoring of signing contracts procedures

Benefits:

- × Attaches more security to the sending and returning process of documents via web.
- × Attaches legal validity to document trades made through electronic media.
- × Improves quality of the relationship.
- × Reducing the cost with outsourcing (dispatchers, Motorcycle courier).
- × Reducing the cost of printing documents and proliferation of redundant copies.
- × Reducing the cost with files of paper documents.
- × Reuse of space before used to put paper documents.
- × Reducing the cost of transmission of documents using traditional methods (mail, express mail, air express mail, courier, etc.) through the delivery of electronic documents with legal validity through electronic media.
- × Improving the visibility through the adaptation to the ecological requirements with the non-use of paper.

Computer Minimum Requirements

Web server:

Processor 3.0 GHZ 512 MB RAM

40 GB of available disk space (HD)

Application and files server:

Processor 3.0 GHZ 512 MB RAM

80 GB of available disk space (HD)

Internet connection:

at least 1 MB link

Database server:

Processor 3.0 GHZ (No Minimo)

40 GB of available disk space (HD)

Workstation:

Pentium II equivalent

20 GB of disk space (HD)

128 MB RAM

Gate USB (Universal Serial Bus)

Acesso to Internet
